## Screen Capture

EFILive Support - 2020-07-28 - Comments (0) - Getting Started

To assist with technical support the following screen capture options are available:

## **EFILive V8 Scan and Tune**

## Scan Tool

Charts, Gauges and Maps displays in the Scan Tool can be copied directly to the clipboard using the **Capture Screen to Clipboard** option on the **[Save]** button.

Tune Tool

Screen, Graphic and Table displays in the [F5: Edit] menu of the Tune Tool can be copied directly to the clipboard using the appropriate options on the **[Save]** button.

## FlashScan/AutoCal V3, FlashScan V2 LCD screen capture

- 1. Open the EFILive V8 Scan and Tune Software.
- 2. Connect FlashScan/AutoCal V3 or FlashScan V2 to your PC.
- 3. Open the **Control Panel** software.
- 4. Navigate to the [F9: LCD Capture] menu.
- 5. Select [Capture] to take a screen capture and [Save] to save your screen capture.
