V3 Software

Cindy Myers - 2020-10-29 - Comments (2) - AutoCal V3 Hardware Configuration

FlashScan V3 and **AutoCal V3** devices are **only** compatible with **EFILive V8.3** software. V3 devices are not compatible with EFILive V8.2 software or V7.5 software.

Please download and install the latest V8.3 software release. NOTE: V8.3 is publicly available as beta release software, the **[Check for Updates]** option in earlier releases DOES NOT look for beta software, only full public release software.

Please manually download the software following the links here http://download.efilive.com/Software/V8/EFILiveV8.3.1_RC_5_Setup.exe

Once installed please be sure to update your firmware and bootblock using the [FlashScan/AutoCal V3 Firmware](#) instructions.
