V8 Editor - Early Access

2020-06-10 - EFILive Support - Comments (0) - General

EFILive is pleased to provide early access to the EFILive V8 Editor in the June 2020 public beta software release.

Selected controllers and operating systems are available for use in this initial release, with platforms to commence moving from V7 to V8 for support over the coming weeks and months. To support the transition to the V8 editor scan, tune and individual windows can now be managed more easily via the Windows Task Bar - or via new drop down button menus in the lower left corner, or via hot keys.

New features in this release include:

• Scan and tune file linking is now supported.

- Software registration is not required.
- Manage customer details per vehicle and use customer details in scan and tune file name templates.
- User defined calibrations conversion process from V7 *.cax file format to V8 *.cax8 format.
- User defined script conversion process from V7 *.txt format to V8 *.Lua format.
- Tune file comparison between different operating systems.
